Defining Image Distribution

Virtua[®] XR

Medical Disc Publisher

Overview

The Codonics Virtua XR Medical Disc Publisher records up to 60 CDs or 30 DVDs an hour. Virtua keeps up with multi-modality environments, and is specifically designed for high-volume imaging applications such as breast MR, PET/CT, MRA and CTA where imaging systems send tens of thousands of images an hour. Customized discs are recorded, labeled and ready to leave with the patient without workflow interruption. The XR's compact design features an advanced processor for receiving and managing studies, a robotic disc recorder and printer, and a user-friendly touch screen interface. The built-in printer produces brilliant, full-color disc labels that include patient demographics and the facility's address and logo for marketing. Customers can create their own custom labels or use Codonics disc label design service offered exclusively to our customers.

Features / Benefits

- Automatically records patient studies without tying up your workstation or employee resources
- On-demand disc creation and labeling directly from modality workstations
- Studies can be conveniently viewed from disc on a workstation using one or more DICOM viewers, specialized viewers and / or custom OEM viewers*
- HL7 and DICOM Structured Reports can be received and matched to a patient's study allowing the recording of both the report and study together on the same disc**
- Intuitive touchscreen turns novices into experts in minutes
- User interface is available in multiple languages
- Scheduled Archive automatically records all studies to disc for backup/disaster recovery. It also records a complete history of all archive activities on each disc**
- Compact design allows for easy siting
- Meets industry standards including DICOM part 10, IHE PDI, and audit logs for HIPAA compliance
